React JS + Redux
Next JS
Nest JS
PostgreSQL
TypeScript
Node JS + Express JS
React Native
MongoDB
Amazon Web Services (AWS)

WORK EXPERIENCE

- Nov 2022- Oct 2023
StrategyWerks | Gurgaon, Haryana
Software Developer Engineer - 1
Worked on different kinds of client projects, for a span of 1 year both at frontend as well as backend, gaining expertise in different tech stacks and libraries.

PROJECTS

- 1337 betting app project:**  
 - Key responsibilities involved building a dynamic widget for the original website, and enhancing the user experience and engagement.
 - Developed functionalities that allowed users to add and remove bets seamlessly, with real-time updates to their wallet balances.
 - Addressed performance challenges, including reducing load times for users from diverse locations such as Nigeria, and leveraging techniques like lazy loading and other optimizations to enhance app responsiveness.
- HR-Portal Project:**
 - Spearheaded the development of an HR portal, serving as a comprehensive employee management system for administrative tasks within the organization.
 - Successfully delivered a fully functional Minimum Viable Product (MVP), streamlining HR operations and improving employee management within the organization.
